County Council 

This image shows an overall view of the proposed pocket park design, when viewed from the High Street, roughly outside Tim's Coffee Lounge or Reeds Rains estate agents

Key features visible in this visualisation include:

1. Level access throughout the park to ensure accessibility for all
2. Public access cycle storage to encourage active travel
3. Bollards to ensure that the park remains pedestrian-friendly. Some bollards can be removed to allow access for maintenance vehicles.
4. A 3 metre high masonry wall at the back of the park, to provide screening and give space for climbing plants and shrubs to grow.
5. A mixture of different seating options
6. Public litter bins
7. Raised bed to the rear of the park including native trees and wildflower planting to encourage biodiversity
8. A low-level planting bed on the corner of High Street and Brighton Road. This will be planted with native species to encourage biodiversity.
9. A small wildflower meadow on the south-west corner (nearest the bus station)
